If the contents list appears empty or out of date, right-click it in Word and choose "Update field".

1 Your role in AutoRep

As a **Company Administrator** you look after your testing company's corner of AutoRep: the tests your testers sync in, and the farm book they test against. Testers run tests on their own devices; everything they sign off arrives in your admin view automatically when they sync.

You can	NZMPTA (Super Administrator) does
See every test synced by your company's testers, and open any of them read-only.	Create and manage tester accounts, roles, licences and certificates.
Maintain your company's farm book — details, contacts, active/inactive.	Maintain the test standards, equipment catalogues and standard fault wording.
Review and approve farms your testers add in the field.	Manage testing companies, regions, milk supply companies, and the app's terms & privacy text.

Note Need a new tester account, a licence date fixed, or a password reset for someone? That is NZMPTA — email the association. Your own password you can reset yourself (section 2).

2 Getting started

2.1 First sign-in

1. Open the AutoRep web address in your browser. Your account is created by NZMPTA — you will receive a welcome email with a link to set your own password (the link lasts 1 hour; use "Forgot your password?" on the sign-in page if it has expired).
2. Choose a password of 12 or more characters including an upper-case letter, a lower-case letter and a digit.
3. Sign in with your email address and password. On first sign-in, accept the **Terms of Use** and sign in again.

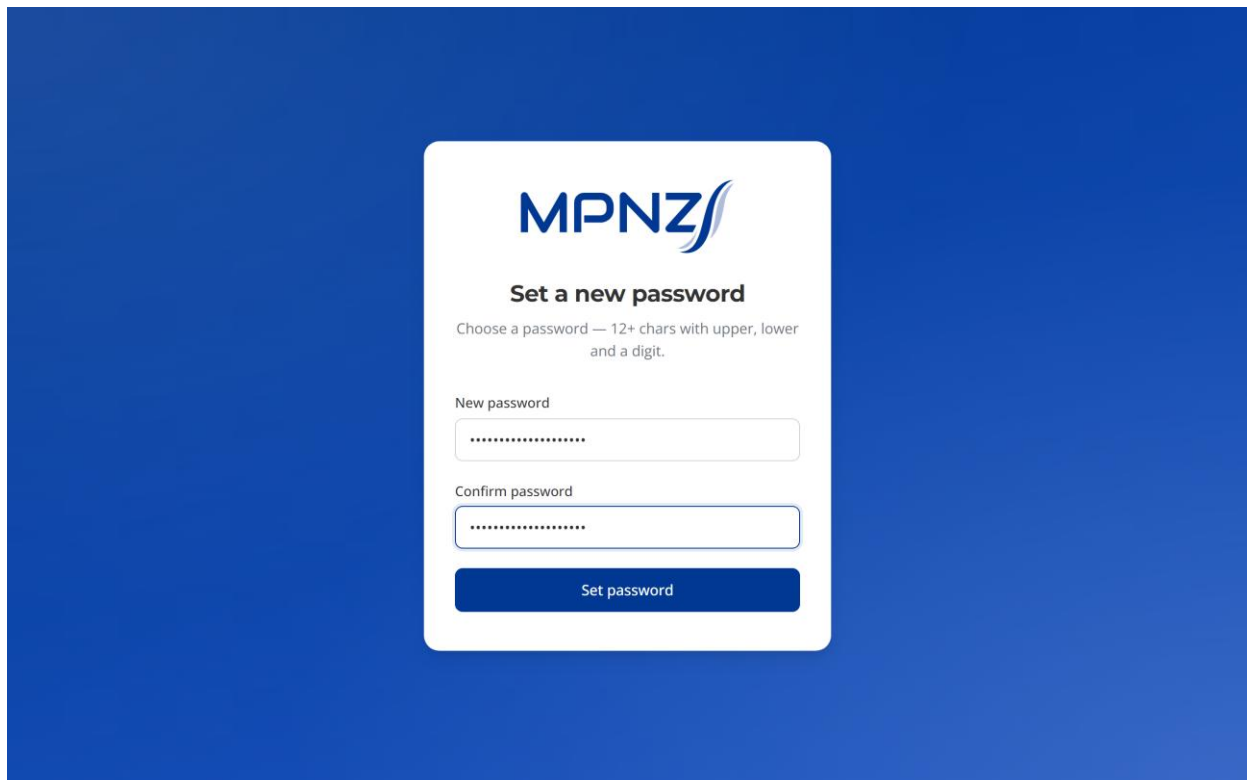

The image shows a web form for setting a new password. At the top is the MPNZ logo. Below it is the heading 'Set a new password'. A message states: 'Choose a password — 12+ chars with upper, lower and a digit.' There are two input fields: 'New password' and 'Confirm password', both containing masked text (dots). At the bottom is a blue button labeled 'Set password'.

Figure 1. Setting your password from the welcome-email link.

2.2 Your account settings

Your email in the header opens **Account settings**: send yourself a password-reset email, and optionally set up two-factor authentication with an authenticator app — recommended for admin accounts.

3 The Admin Portal

You land on the Admin Portal after signing in. Your working areas are in the header: **Home**, **All tests** and **Farms**.

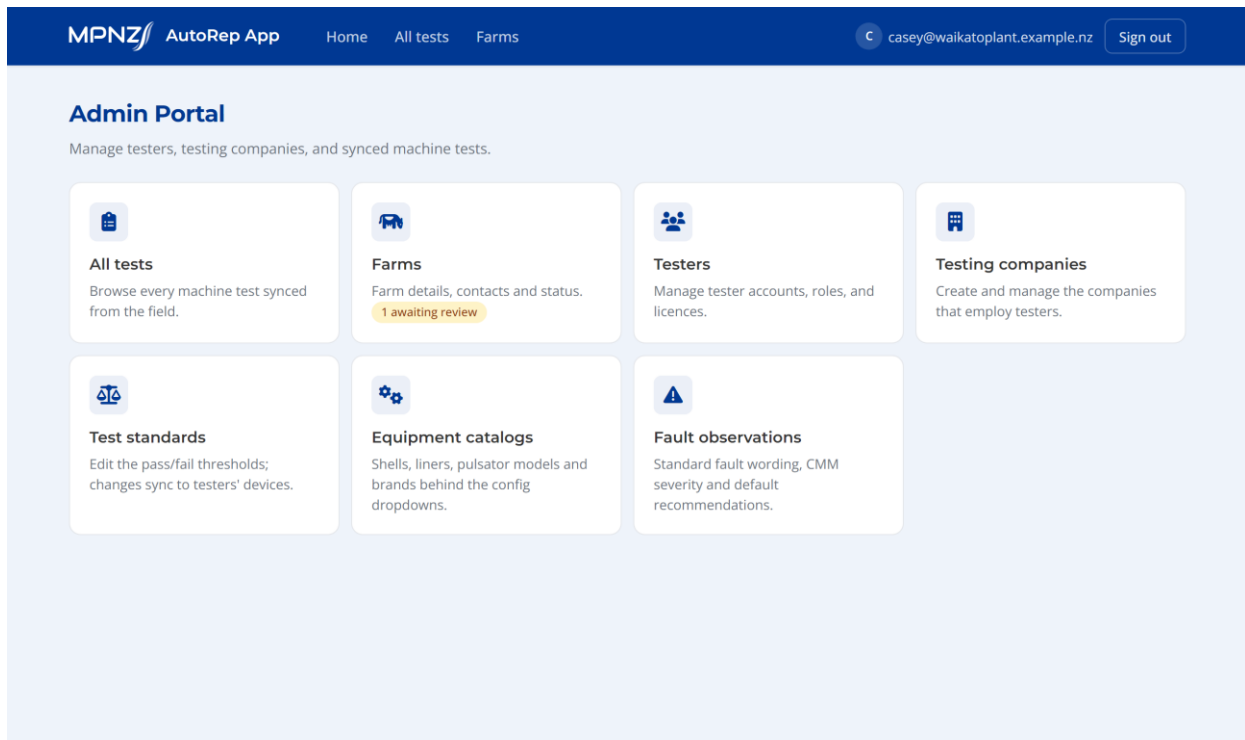

Figure 2. The Admin Portal as a Company Administrator. Note the “awaiting review” count on Farms.

Important The portal shows tiles for every admin area, but five of them (Testers, Testing companies, Test standards, Equipment catalogs, Fault observations) are NZMPTA-only. Opening one of those shows “Access denied” — nothing is wrong with your account; they are simply not part of the Company Administrator role.

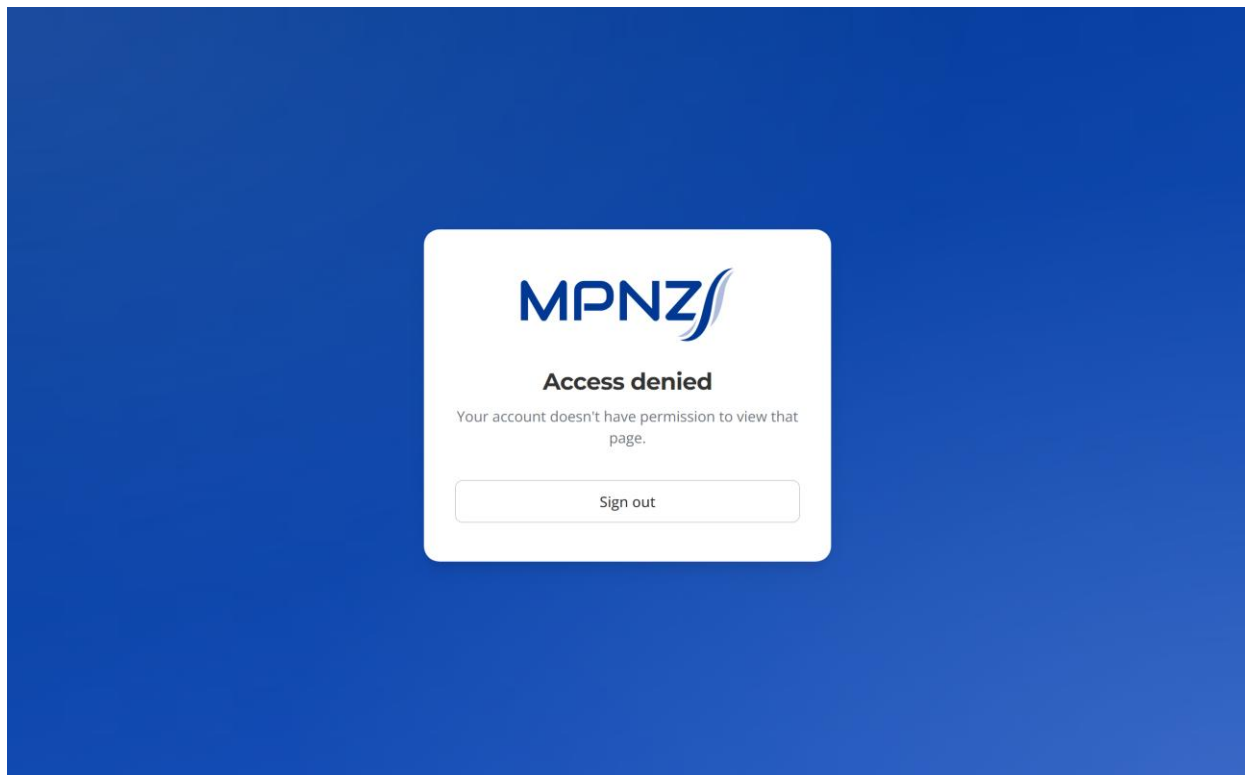

Figure 3. NZMPTA-only areas show Access denied for Company Administrators.

4 All tests

All tests lists every machine test your company's testers have synced — both in-progress and completed. It is pinned to your company: you never see (and cannot reach) another company's tests.

1. Search by farm name or tester email, or filter by tester, then press Search. Clear resets the list.
2. Press **View** to open a test exactly as the tester recorded it — read-only, with pass/fail as it stood at test time.
3. The list pages 50 at a time — use ‹ Prev / Next › at the foot.

Figure 5. Viewing a synced test — the full wizard, read-only.

Note Testers keep working copies on their own devices; a test appears (and updates) here when they sync. An amended test appears as a new version; superseded versions remain in the record.

5 Farms

5.1 The farm book

Farms is your company's farm book: every farm your company has set up or tested. Search, check the status badges (**Active**, **Inactive**, **Under review**), see how many tests each farm has, and press **Edit** to open one. The **Tests** count links straight to that farm's tests.

Figure 6. The farm book — farms awaiting review float to the top with a banner.

5.2 Reviewing farms your testers add in the field

Testers can add a farm on the spot when it is not in the book — that is deliberate, so a missing record never blocks a test. Each one is flagged **Under review**, floats to the top of your Farms list, and you receive an email ("Farm awaiting review: ..."). The farm is fully usable for testing while it waits.

1. Open the farm from the banner or the list — the amber panel names **who** added it in the field and **when**.
2. Check the details across the four tabs; fix anything mis-typed (supply number and region are the usual suspects) and add anything missing.
3. Press **Approve farm**. The badge clears and the farm becomes a normal, active entry in the book.

The screenshot shows the MPNZ AutoRep App interface. At the top, there's a dark blue header with the MPNZ logo, 'AutoRep App', and navigation links: Home, All tests, and Farms. A user profile icon and email 'casey@waikatoplant.example.nz' are on the right, along with a 'Sign out' button. Below the header, the page title is 'Kowhai Flats' with a subtitle '0 test(s) · last edited 26 Aug 2026'. On the right, there are 'View tests' and 'Back' buttons. A yellow banner at the top of the main content area states: 'Under review. This farm was added in the field by Sam Tester on 27 Aug 2026. Check the details, correct anything that's wrong, then approve. Testing against it isn't held up.' A blue 'Approve farm' button is on the right of this banner. Below the banner is a form with four tabs: 'Identity' (selected), 'Location', 'Farmer contact', and 'Notes & status'. The 'Identity' tab contains three input fields: 'Farm name' (filled with 'Kowhai Flats'), 'Supply number' (filled with '58212'), and 'Milk supply company' (a dropdown menu with 'Fonterra' selected). A blue 'Save farm details' button is at the bottom of the form.

Figure 7. A field-created farm — provenance banner, details to check, and the Approve farm button.

This screenshot shows the same MPNZ AutoRep App interface as Figure 7, but the farm's status has changed. The yellow 'Under review' banner is replaced by a green banner that says: 'Farm approved — it's no longer flagged as under review.' The 'Approve farm' button is no longer present. The form details (Farm name: Kowhai Flats, Supply number: 58212, Milk supply company: Fonterra) and the 'Save farm details' button remain the same.

Figure 8. After approval the farm is a normal Active entry.

5.3 Editing farm details

One form, four tabs, one **Save farm details** button:

Tab	What lives there
Identity	Farm name, supply number, milk supply company.
Location	Address (line 1 offers NZ Post address suggestions while you are online), town, region, post code, RAPID number.
Farmer contact	Farmer name, phone, email — with the Privacy Act collection notice alongside.
Notes & status	Free notes, and the Active checkbox.

[Save farm details](#)

Figure 9. Location tab — address line 1 suggests NZ Post addresses as you type.

- Use **View tests** (top of the farm page) to jump to every test on this farm.
- Mark a farm **Inactive** (Notes & status tab) when it should no longer be offered to testers — history is kept, nothing is deleted.

Note New farms are normally created by testers from the New-test page (and then reviewed by you). If you also hold the Tester role yourself, farms you add that way are trusted and skip the review flag.

6 Working with your testers

- A tester's licence is managed by NZMPTA; equipment calibration dates are maintained by the tester in-app. Expired calibration warns the tester but never blocks a test, and the dates in force are stamped into each signed-off report.
- A tester whose licence has expired can still sign in to send un-synced tests — nothing on a device is ever stranded.
- Tests are per-tester on each device; on shared tablets, testers should sync before handing a device over.

7 Troubleshooting

Symptom	What to do
A tester's test isn't showing in All tests.	It has not synced yet — the tester needs a connection and Sync now (or to sign the test off while online). It appears here as soon as it syncs.
A tester can't sign in.	After 5 wrong attempts the account locks for 15 minutes. Licence expired or account issues are NZMPTA — email the association.
A farm appears twice.	Tidy the details of the correct record, mark the duplicate Inactive, and let NZMPTA know if the two need merging.
I opened a tile and got Access denied.	That area is NZMPTA-only (see section 3) — your account is fine.
I need to add a tester / change a licence.	NZMPTA does this — email the association.
